## ABOUT ME

I have learned all of my software development skills from BoiseCodeWorks full stack immersive software course, learning HTML/CSS Javascript, AngularJS, node and .NET

Part of the reason that I decided I wanted to be a software developer is because I love getting lost in challenges, fundamentally that's what computer programming is, solving challenges. I work well individually and well with others, often finding myself in leadership roles taking the initiative I am a quick learner, and love to learn new things!

## EXPERIENCE

### **Xerox Wireless Data Service, Boise, ID** - *Tier 2 technical support agent*

2015 - 2016

- Gained the ability to navigate through multiple computer applications with speed and accuracy
- Conveyed technical and complex information to Verizon Wireless customers to help with configuring or troubleshooting their device(s).
- Was an opportunity to accept and implement coaching and feedback in order to achieve individual and team performance metrics
- Performed well with little supervision, and in a fast paced environments

## Web Development

- Solid Javascript fundamentals including ES6
- AngularJS: Component based architecture, SPA development (Single Page Applications)
- NodeJS: Express, custom middleware, Passport, Heroku deployment, Socket.IO
- An understanding of SQL, and NoSQL databases
- Amazon Web Services

## EDUCATION

### **Boise State University - Computer Science**

January 2015 - January 2016 (Currently on academic break)

I started at BSU at the ripe age of 17, and I have decided to go on a break

While I value a traditional education I am confident that the skills I possess now can translate into a career, and I may finish my education later in life
